**Directions**

**How to reach Centennial Campus?**
The Toxicology Building is located on Centennial Campus of North Carolina State University. Centennial Campus is located inside the Raleigh city limits, just two miles from downtown and the State Capitol. Interstate 40 provides a direct connection to Research Triangle Park and RDU International Airport, both located 15 miles west of Centennial Campus.

**If you are on I-40 coming east:**
Take Gorman Street exit. Turn left onto Gorman. Turn right at the second light onto Avent Ferry Road. Turn right at the second light onto Varsity Drive.

**How to reach the Toxicology Building on Centennial Campus:**
Travel on Varsity Drive to the intersection of Varsity Drive and Main Campus Drive. Turn left onto Main Campus Drive. The Toxicology is the second building on the left (850 Main Campus Drive).

**How to reach the parking lot:**
To reach the parking lot, pass the Toxicology and Partner II buildings and turn left at the next crossroad (T-junction). You will see some greenhouses. Take a left at the end of this drive. Take first left (looks like you’re going towards the loading dock) turn immediately to the right into a parking lot – drive to the far back parking lot -- this is the back of the Toxicology Building. Please park on the back deck and walk to the back door on the same level you parked on.

**How to reach the auditorium:**
The building will be unlocked until all workshop participants arrive. Go up the stairs to the second (top) floor. The entrance to the auditorium will be on your left.
